About us

- We provide cyber news for everyone: those both inside and outside the cyber world
- We're a deeply reported top ten Apple tech news podcast
- We have an experienced news team and we land exclusives
- We are regular contributors to NPR and PRX news magazines
- We have been recognized for our work with National Edward R. Murrow awards, Webby honors, several National Headliner awards, and honors from the Atlanta Press Club

No technical knowledge required.

Click Here is a news show that goes behind-the-scenes of today's biggest cyber and intelligence stories with character-driven narratives. We make even the more complicated stories interesting and accessible.

With former NSA contractor Reality Winner in Texas.

We land newsy exclusives.

Whether it is landing interviews with the head of Ukraine's SBU, talking to one of the FBI's most wanted hackers, or sitting down with former NSA contractor Reality Winner just weeks after her release from prison, *Click Here* has been landing exclusive interviews with newsmakers since its inception. Other outlets follow us.

We tell the stories behind the headlines.

Ukraine has been ground zero for the world's first truly hybrid war – combining cyber attacks with traditional warfare.

Click Here has been uniquely placed to report on the conflict. We went to Ukraine and visited underground drone factories, pulled back the curtain on Russia's efforts to attack Ukrainian culture, and broke a roster of stories about Moscow's cyber operations there.

In Ukraine, reporting on the first truly hybrid cyber war.

We have experience.

Dina Temple-Raston leads the [Click Here](#) editorial team. Dina, the host and managing editor producer of the show, has been a journalist and award-winning author for 30 years. She was a longtime NPR National Security Correspondent and was part of network's Investigations team.

Interviewing then-NSA Director Gen. Paul Nakasone.

We have a loyal, growing listenership.

Three million episode downloads in the show's first three years.

Over 100,000 downloads a month across our catalog.

Five months after launch, number one Apple tech news podcast in the U.S. and the U.K. and remained in the top ten since.

Recorded Future
News

We have stories about more than just cyber attacks.

- Ep. 7.** Fighting Russia with computers, not rifles
- Ep. 15.** At war with facial recognition: Clearview AI in Ukraine
- Ep. 30.** The scariest piece of malware since Stuxnet
- Ep. 37.** 'Presence Matters': Nakasone and Easterly on Ukraine
- Ep. 64.** Portrait of Baasterlord as a Young Man
- Ep. 70.** An unlikely teacher: what Wagner Group learned from ISIS
- Ep. 76.** The Mexican army's love affair with spyware
- Ep. 78.** Trouble in the Cloud
- Ep. 81.** Ilya Sachkov v. the Kremlin
- Ep. 92.** Israel, Gaza and all the light you cannot see

We're on your radio, too.

Click Here stories appear regularly on PRI's *The World*, *Marketplace Morning Report*, *Marketplace Tech* and NPR's news magazines. We worked with WNYC to produce five one-hour radio specials airing on some 130 NPR member stations across the country.
